

Decision Proposal 162 | Authorisation Flow

This board covers the following proposed CX Standards:

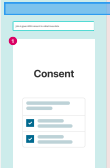

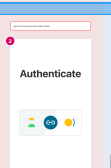

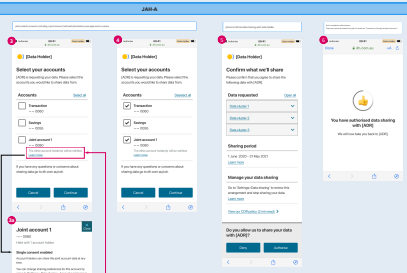

- Notification alerts, Option 2: Centralised Alert
- Vulnerable Joint Account Holders, Option 2: Authorisation Alert
- Pending Disclosures, Option 2: Pending Status Provisions

NB: These designs are for illustrative purposes only to assist consultation and have not been assessed for rules compliance. They represent the broad intent of the joint account CX Guidelines, pending the outcomes of consultation. Participants are advised that initial reference points for implementation, but no sharing of responsibility for the CDR parameters.

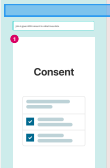

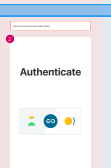

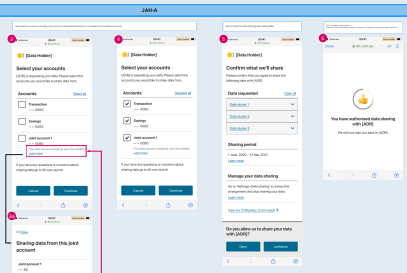

Glossary

JAH1	Joint account holder 1 (applicant, unless otherwise specified)
JAH2	Joint account holder 2 (applicant, unless otherwise specified)
JAH	Joint account holder (applicant, unless otherwise specified)
JAH1A	Joint account holder 1 (applicant, unless otherwise specified)
JAH2A	Joint account holder 2 (applicant, unless otherwise specified)
JAH	Joint account holder (applicant, unless otherwise specified)
JAH1B	Joint account holder 1 (applicant, unless otherwise specified)
JAH2B	Joint account holder 2 (applicant, unless otherwise specified)
JAH	Joint account holder (applicant, unless otherwise specified)

2.1 | Authorisation Flow: Default - Pre-Approval

Concept [Data sharing from a joint account (pre-approval)]	Consent	Authenticate	Authorise	Complete
 <p>Joint account holder A (JAH1A) and joint account holder B (JAH2B) share a joint account with a pre-approved disclosure option.</p> <p>JAH1A is able to share data from Joint Account 1. JAH2B will be notified that Joint Account 1 is being data for a new authorisation.</p> <p>Key CDR rules</p> <p>MS.5 Disclosure options for joint accounts Disclosure option Disclosure of joint account data may be authorised only as permitted by the disclosure option that applies to the joint account.</p> <p>This may be any of the following:</p> <ul style="list-style-type: none"> the pre-approval option, under which joint account data may be disclosed in response to a valid consumer data request only after the disclosure of the requested authorisation approval of the relevant account holder; the in-agreement option, under which joint account data may be disclosed in response to a valid consumer data request; the non-disclosure option, under which joint account data may not be disclosed. <p>The data holder must provide for the pre-approval and non-disclosure options to be available for a joint account.</p> <p>Optional option Unless a valid disclosure provides otherwise, the pre-approval option applies to a joint account by default.</p> <p>Proposed CX Standards covered in flow Notification alerts Option 2: Centralised Alert</p>				

2.2 | Authorisation Flow: Rule 4A.15 Exemption for Joint Account Holder

Concept [Data sharing from a joint account (over a joint account holder)]	Consent	Authenticate	Authorise	Complete
 <p>Joint account holder A (JAH1A) is a joint account with joint account holder B (JAH2B).</p> <p>In this scenario however, the data holder treats JAH1A's joint account like an individual account to consent, display or manage terms of access. This allows the data holder to log into JAH1A when JAH1A shares data from their joint account. JAH1A is able to share data from their joint account, as authorised by the data holder JAH1A, on an individual basis for each joint account data sharing independently.</p> <p>Key CDR rules</p> <p>MS.5 Exemption of form A data holder is not liable under these rules for a data request that is not authorised if it is provided that the request is not an attempt to manage or display terms of access or manage or display terms of financial form or allow to any person.</p> <p>Proposed CX Standards covered in flow Vulnerable Joint Account Holders Option 2: Authorisation Alert</p>				

2.3 | Authorisation Flow: Co-Approval

Concept [Data sharing from a joint account (co-approval)]	Consent	Authenticate	Authorise
 <p>Joint account holder A (JAH1A) and joint account holder B (JAH2B) share a joint account with a co-approval disclosure option.</p> <p>JAH1A requires JAH2B to approve to share data from Joint Account 2. Data from this account will not be used by JAH1A given approval and will show a pending status.</p> <p>JAH2B will be notified that Joint Account 2 requires approval.</p> <p>Key CDR rules</p> <p>MS.5 Disclosure options for joint accounts Disclosure option Disclosure of joint account data may be authorised only as permitted by the disclosure option that applies to the joint account.</p> <p>This may be any of the following:</p> <ul style="list-style-type: none"> the pre-approval option, under which joint account data may be disclosed in response to a valid consumer data request only after the disclosure of the requested authorisation approval of the relevant account holder; the in-agreement option, under which joint account data may be disclosed in response to a valid consumer data request; the non-disclosure option, under which joint account data may not be disclosed. <p>The data holder must provide for the co-approval option to be available for a joint account.</p> <p>MS.15 How data holder is to deal with a consumer data request Co-approval option If the approval option applies to the joint account, the data holder must, subject to subrule (2),</p> <ul style="list-style-type: none"> ask the requester for authorisation in accordance with rule 4A.15 and Division 4.6 and if the authorisation is given, invite the approval of the relevant account holder in accordance with rule 4A.15, and if the relevant account holder does not give their approval, comply with rules 4.4 to 4.7. <p>Proposed CX Standards covered in flow Notification alerts Option 2: Centralised Alert</p> <p>Pending Disclosures Option 2: Pending Status Provisions</p>
