

Hello

Test 1.

This is a Dummy PDF document with the word BI in its content and no inline images.
PyPDF should parse it properly, and should not return any inline images.

Test 2.

This is test also with BI in the text
I put first) and then another BI with whitespaces

Test 3.

The line has) and then another BI with whitespaces

Test 4.

The line has (and then another BI with whitespaces

Test 5.

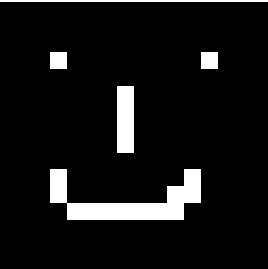

The line has both brackets () and then another BI with whitespaces

Test 6.

The line has (random unmatched brackets and () then another BI (with whitespaces()

Test 7.

The line first has BI and then) bracket

Test 8.  This is a test with operators BI and ID and some text EI (as) well
Test
