## Introduction

- Energetic and experienced I.T professional who works every day to learn, adapt, and grow in a constantly changing technology landscape.
- Contributes to bottom line improvement by identifying and solving complexity which leads to repeatable, scalable, improvements in value creation.
- Delivers results by working to understand the client's business, what they solve, how they solve it, so that they remain competitive and differentiated.
- Create value by focusing on solutions that improve client outcomes. Guides, leads, and manages teams through full and open communication to meet and exceed commitments. Manages daily activities of the team using Agile / Scrum and constantly seeks to eliminate or reduce barriers to the team's success.
- Leverages a diverse professional background that includes entrepreneurship and cultural diversity, that is not constrained by resistance to change, to identify unique and future proof solutions through ideation, creation and invention whilst maintaining cultural and human respect.
- 30 years of business analysis combined with a hands-on, current, and evolving technology skill set, processes, and methodologies.
- Solves complex problems in innovative ways to help organizations grow, adapt, and execute their strategy. Most comfortable working with many tasks but also able to zero in and concentrate on specific problems. Strategy minded but tactically focused I can think at a high level but switch to filling gaps in the team when needed.
- Excellent communication skills, written and verbal.
- Project management skills. Waterfall, Agile, Scrum
- Strong change management skills in helping guide clients through tech adoption led me to consulting on a variety of similar projects throughout the world (United Kingdom, Germany, Australia, Canada, United States)
- Multi-faceted career focused on creating value and scaling whether as an employee, consultant or entrepreneur.
- Comfortable and capable of communicating with c-suite, directors and team members, customers and finding common ground.

## Work Experience

### Civeo Corporation

Information Technology Reporting Analyst

Edmonton, Alberta

September 2022 to present.

- Responsible for the Incorta Reporting platform including system administration and migration, planning, and data migration. Coordinated reporting requirements with Australian and North American operations to move reporting from legacy platforms to Incorta. This role required a significant amount of self-learning and initiative in an environment that has minimal methodologies, processes, and operational support.
  - Completed the transition of reporting from the Oracle Business Intelligence platform (OBIEE) to Incorta with very little operational support in the first 6 weeks of employment.

### Nimble Elephant Navigation Inc.

Full Stack Developer

Edmonton, Alberta

August 2020 to September 2022

- Built the proprietary multi-faceted platform using Next.js, React, Sanity.io, PostgreSQL, Python, and the Google Cloud Platform (GCP)
- Built an automated research robot to crawl and classify website content.
- Built Authorization and Authentication system to meet HIPAA specification for health information and privacy.

### Self Employed

Consultant and Entrepreneur

Edmonton, Alberta

July 2010 to September 2022

- Secured financing to build CrossFit 5413 (a partnership with Rock Jungle Fitness) which was Alberta's largest CrossFit style gymnasium. This involved renovating a 50-year-old warehouse style building to meet local safety regulations and property standards, sourcing equipment, hands-on building, code compliance, marketing, staffing, managing both a team and the project design, build and operations.
  - Grew revenues from \$3,000 first month to over \$20,000 in 18 months prior to shutdown (Covid related)
  - Founder and Owner of CrossFit Aurora
- Information Technology consultant for Kids Uncomplicated.
  - Re-focused the application development team to off device computer vision facial recognition to achieve prototype success. The result was ported to in-app when device technology could accommodate the necessary processing.
  - Worked with the founder to identify and present proprietary solutions to possible partners.
- Manager of Transportation and Logistics – Canada North Camps
  - Responsible for a team of professional heavy hauling drivers
  - Obtained Class 1 driving license.
  - Worked with management to prototype inventory management/warehousing using Odoo.
  - Developed and managed operational budget, team performance, and hiring.
- Founder and Owner of CrossFit Aurora

### Alberta Municipal Affairs

Manager, Planning and Enterprise Architecture

Edmonton, Alberta

March 2007 to July 2010

- Developed a 7-point, 5-year strategic plan.
- Implemented an I.T Governance committee based on CoBit best practices.
- Prototypes the introduction of Business Process Automation using Appian.
- Implemented Ministry I.T Portfolio and Program Management.
- Implemented a cost of ownership modelling tool for the management of purpose-built applications.

### TELUS

Senior Business Analyst

Edmonton, Alberta

April 2006 to April 2007

### 1986 – 2006 – Various technology roles in Australia, Canada, and Europe

- CGI – Contract – Develop and build a system to automate the process of exploration applications (imagery and documents).
- Kidtropolis – General Manager.
- Fujitsu Consulting – Applications Portfolio Manager, Applications Development team.
- Orange Telecommunications, United Kingdom, Contract – Senior Business Analyst.
- Ventelo Telecommunications, United Kingdom, Contract – Billing Systems Analyst.
- US interactive - India, United Kingdom, Germany – Project relationship manager.

- ADC Telecommunications / Saville Systems, Canada – Billing Systems Configuration Analyst.
- Optus Telecommunications, Australia – Translations/Network Engineer, Internal Auditor, Group Credit Analyst, Billing Analyst.
- Alcatel Australia – Test Engineer (AXE and System 12), Senior Technical Officer, Cadet.

### Interests

- Continuous learning and development including the pursuit of:
  - Pursuing a Bachelor of Science (Machine Learning) with the University of London – Expected graduation in 2028.
  - Pursuing a Full Stack Developer diploma with the University of Alberta – Expected graduation in 2026.
- Solving problems using technology to create, automate, improve efficiency, reduce redundancy.
- Travel, fitness, music.
